EXPERIENCE

GENERAL ASSEMBLY
Web Development Immersive Student, January 2018-April 2018

» Completed 500+ coding hours in 12-week web development course

» Trained in front-end and back-end web languages and frameworks

Life Soundtrack

A journaling web app themed around one's most beloved songs. Registered users record their encounters and thoughts on individual songs that were important at different points in their life. The records are then chronologically grouped together in user-defined musical phases. Built with vanilla JavaScript and Ruby on Rails

Raindrop Shop

An e-commerce platform built using Node.js/Express for the API, vanilla Javascript, jQuery, and bootstrap HTML/CSS for the front-end client, and Stripe platform for online transactions.

Wait But Why

A microblogging and social media site conceived as a LinkedIn-esque platform where users post about events in their lives framed with the question of why such events even happened in the first place. Built with frameworks Ember.js and Ruby on Rails.
