EXPERIENCE
FUIGO
Software Engineer, July 2018-Present
- Developed the Fuigo Marketplace, a one-stop e-commerce platform for interior design products, built with Vue.js and Node.js (MongoDB).
- Improved Fuigo Marketplace's message center features for real-time communication between designer and vendor personas.
- Implemented new sign-up flows for Fuigo Marketplace based on three different user personas.
- Help with maintenance and administrative features for the Fuigo Project Management web app, built with Vue.js and Ruby on Rails.
- Lead redesign implementations and mobile optimizations for Fuigo Marketplace and Project Management front-end apps.
- Built out an internal feature for Fuigo administrators to diagnose and debug errors created through user actions.

KATHRYNGOSHORN.COM
Front-End Developer, June 2019-July 2019
- Developed portfolio site for Brooklyn-based artist Kathryn Goshorn, built with React.js.

GENERAL ASSEMBLY
Web Development Immersive, January 2018-April 2018
- 12-week course spent developing three full-stack web apps using JavaScript, HTML5/CSS3, Ember.js, Ruby on Rails, and MongoDB:

  Life Soundtrack

  A journaling web app themed around one's most beloved songs. Users record their encounters and thoughts on individual songs that were important at different points in their life. Built with JavaScript, Ruby on Rails, and PostgreSQL.

  Raindrop Shop

  An e-commerce platform built using Node.js/Express.js and MongoDB for the API and vanilla JavaScript, jQuery, and Bootstrap HTML/CSS for the front-end client. The Stripe API was used for online transactions.

  Wait But Why

  A microblogging and social media site where users post about events in their lives while exploring the question of why such events even happened in the first place. Built with frameworks Ember.js and Ruby on Rails.

AGENCY 451
